PROFESSIONAL SUMMARY

Process improvement and digital transformation professional with a Computer Science background, combining a Lean-driven approach to workflow redesign with hands-on automation delivery. Proven record of mapping current- and future-state processes, eliminating waste, and building the technology (Python, Selenium, Power Platform, AI) that sustains improvement — cutting manual effort by 300+ hours annually. Experienced in leading cross-functional projects, facilitating stakeholder workshops, and driving change adoption to turn process analysis into scalable, high-impact digital solutions.

CORE COMPETENCIES

Project Management | Digital Transformation | AI Agent | Process Automation | Python | Selenium | Power Platforms | Continuous Improvement | VBA | AI & Automation Solutions

PROFESSIONAL EXPERIENCE

ASTRAZENECA

Petaling Jaya

Project Management Analyst

Jul 2025 – Present

T&E AI Audit Chatbot (LEAN Hackathon 2026)

- Co-developed an AI-powered Travel & Expense (T&E) Audit Assistant using Microsoft Copilot Studio and Generative AI technologies to streamline audit review activities.
- Designed chatbot capabilities to analyse receipts, supporting documents, country-specific policies and exception scenarios to improve audit efficiency and compliance review.
- Collaborated with cross-functional teams to develop scalable AI use cases for enterprise finance operations.
- Awarded Most Scalable Solution Award for demonstrating high potential for global deployment across audit and compliance processes.

Allocation Automation (Accounts Payable)

- Designed and developed an end-to-end allocation automation solution using Python, Selenium, and data transformation tools, reducing manual allocation effort by 220 hours per annum.
- Collaborated with AP stakeholders to document business requirements, validate allocation logic, and ensure process compliance.
- Delivered a scalable solution that improved allocation accuracy and streamlined operational workflows.
- Supported solution testing, user adoption, and continuous improvement initiatives.

P2P Digital Champion Co-Lead

- Co-led the establishment and governance of the P2P Digital Champion team, driving digital transformation and continuous improvement initiatives across Procure-to-Pay operations.
- Evaluate and prioritize automation opportunities, digital solutions, and AI use cases to improve operational efficiency.
- Collaborate with AP, Procurement, Finance, and IT stakeholders to align project objectives and governance standards.
- Provide oversight and guidance on digital projects throughout the project lifecycle, from ideation through implementation.
- Promote a culture of innovation and continuous improvement within the P2P organization.

Vendor Portal Optimization

- Performed data-driven analysis of vendor onboarding trends, portal adoption metrics, and AP operational data using Excel, Pivot Tables, AI-assisted analysis, and SAP extracts.
- Identified process bottlenecks and opportunities to increase vendor self-service adoption.
- Developed insights and recommendations to improve vendor onboarding efficiency and reduce AP support workload.
- Supported AI proof-of-concept initiatives to evaluate opportunities for process optimization and user experience improvements.

Email Automation (Lean Process Improvement)

- Identified non-value-added manual steps in document processing workflow and proposed an automation solution to eliminate waste (excess processing and waiting).
- Solo designed and implemented a SharePoint-based automated workflow to extract ZIP files and trigger downstream notifications, reducing manual handling effort by approximately 60 hours annually.
- Applied Lean principles to map the current-state process, identify inefficiencies, and deliver a streamlined future-state workflow.
- Managed stakeholder engagement, testing, and change adoption to ensure sustained process improvement.

Sustainability AI Education Initiative

- Solo led the creation of an AI-powered animated educational solution to support AstraZeneca's Young Health Programme (YHP).
- Developed a reusable digital learning asset featuring a custom AI-generated character, delivering health and wellness education in an engaging format.
- Designed content on nutrition, physical activity, BMI awareness, and healthy lifestyle practices for students participating in community outreach programmes.
- Established a scalable content model that can be deployed across multiple schools, improving programme reach while reducing content development effort.
- Supported health education initiatives targeting students from underserved and lower-income communities.

Creative Support Projects

- Edited and produced video content for APAC Lead's presentation during SVP arrival, ensuring high-impact visual storytelling.
- Created animated explainer videos for refresh time calculation and dashboard user manual, improving internal training and user adoption.
- Coordinated with stakeholders to align visual assets with branding and instructional goals.

CERTIFICATIONS

Lean White Belt — AstraZeneca, 2026

EDUCATION & CREDENTIALS

Bachelor of Computer Science (Hons), Multimedia University
